

FROM THE SCORER'S TABLE

Did you notice the difference in the terminology? Once again we are adjusting to slight changes, one of which is the term we use to refer to the person who keeps score. Now we are scorers instead of scorekeepers. You will see the new terminology in the new DCR. This is the year that the books come out for the two year period 2011-2013. You can access the current rules at www.usavolleyball.org.

Scoresheet Changes for Second Libero

There will be some additions to the score sheet this year. With the addition of a second libero being allowed, the score sheet will have two boxes for the designation of two liberos. If no libero is being used, place an X in both boxes. If one libero is being used, place that libero's number in the box on the left and an X in the box on the right. If two liberos are being used, place the number of the libero that is going to take the court first (the acting libero) on the left and the other libero's number (the second libero) on the right. Once this libero replacement takes place, the liberos can replace each other or any back row player. Remember that a completed rally needs to take place before any replacement can occur and that the player that was replaced must be the player returning when the libero rotates to the front row. There can only be one libero on the court at a time. The tracking sheet might look like this: 6 L 6 L L 6. Remember that liberos cannot be team or floor captain.

For all current scorers, check under the officials tab of your Webpoint registration for your status and whether you need to take the test this year. You can check this at the same time you are registering.

For new scorers, you will also need to be USAV/CHRNA registered, so take care of that and then check out the officials section at www.chrva.org.

You must be a certified scorer to be a certified referee. So if refereeing is your goal, make sure to get to a clinic in October so you can get your scoring ratings in November at a Fellowship.

Each team must have a scorer to play in CHRNA tournaments. Plan ahead and make time for the scorer clinic.

If you are interested in contributing to the scoring program in the region, be sure to get in contact with me. I am always looking for new folks to help rate, teach, mentor, etc.
